PROFESSIONAL SUMMARY

3rd-year Information Science & Engineering student with hands-on experience building full-stack applications integrating AI, automation, and cybersecurity concepts. Projects built with React, Node.js, Express.js, MongoDB, Python, and the Gemini API. Seeking software engineering, full-stack, AI/ML, or cybersecurity internships.

TECHNICAL SKILLS

Languages	Python , Java, JavaScript
Frontend / Backend	React.js, HTML, CSS, Node.js, Express.js, REST APIs
Databases	MongoDB, MongoDB Atlas, SQL
AI / ML	Pandas, NumPy, Matplotlib, Machine Learning Basics, Predictive Modeling, Gemini API (Google GenAI), Generative AI Applications, Prompt Engineering
Automation / Tools	n8n (Webhooks, Gmail, Google Sheets, Calendar, AI Agent Workflows), Streamlit, Git, GitHub, Docker, VS Code
Security Concepts	Authentication, Authorization, API Security, Rate Limiting, Input Validation, Request Monitoring, Web Application Security, Basic Networking
Problem Solving	Data Structures & Algorithms (Python for LeetCode , Java)

EXPERIENCE

- AI & Generative AI Intern | MirAI
  Developed AI Resume Critic using Python, Streamlit, and Gemini API for resume analysis, keyword identification, and improvement suggestions.
  Explored Generative AI, RAG concepts, AI agents, and n8n workflow automation.

- Software Development Intern | SkyForger Technologies
  Built a Civic Issue Reporting Platform using React, Node.js, Express.js, and MongoDB.

Implemented REST APIs, duplicate image detection, upload restrictions, and n8n-based automated email notifications

PROJECTS

Civic Issue Reporting & Automation Platform

React, Node.js, Express.js, MongoDB Atlas, n8n, Webhooks, Gmail/SMTP

- Developed a full-stack platform where users report civic issues with title, description, location, and image, and track status (Open, In Progress, Pending, Resolved).
- Built Express.js REST APIs with MongoDB Atlas storage, duplicate image detection using image hashing, and upload/spam restrictions.
- Integrated n8n webhooks to validate descriptions against civic keywords (road, garbage, pothole, drain, leakage, traffic, streetlight) and send authority notification emails.

AI Resume Critic (Tech-Roast)

Python, Streamlit, Gemini API, PyPDF, python-dotenv | Deployed on Streamlit Cloud

- Built a Streamlit app that analyzes a resume (PDF or pasted text) against a target job description using the Gemini API and system prompting.
- Generated structured feedback: missing keywords, weak bullets with improved rewrites, and red flags; used PyPDF for extraction, environment variables for API key management, and session state.

AI Multiverse of Chatbots

Python, Streamlit, Gemini API

- Built a multi-personality chatbot app with fixed and custom personalities via custom system prompts and session-state-based conversation memory.

EDUCATION

B.E. in Information Science & Engineering (3rd Year) Expected: [2028] | CGPA: [9.2]
Dayananda Sagar Academy of Technology and Management (DSATM), Karnataka, India
